

UNIVERSITY ADMIT ELIGIBILITY PREDICTOR

Why we need University admit eligibility predictor ?

To classify the students based on their cutoff marks for their eligibility in college and also for deserving candidate will be selected.

What are the uses of it ?

It helps students for decision making for right college , easy accessibility , occurrence of error is less , easy to check the application availability.

What are the issues in it ?

The person who is in low literacy can't access it , inaccurate result if data entered incorrectly , need internet connection and electronics devices .

About this project

For the students who have the trouble in taking decision making in choice of their college , this university admit eligibility predictor helps to make the choice in college for their mark with eligible college. According to mark of the student , the college will be allocated .

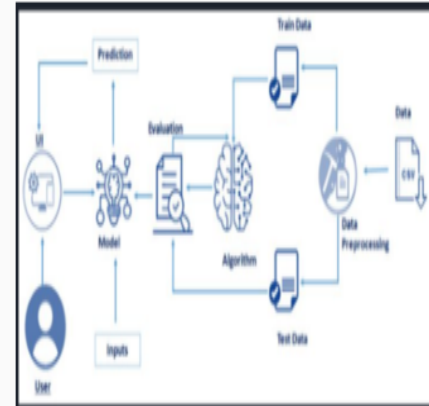

GOAL

To develop an admission predictor by analysing the different factors that impact admissions into a graduate school

PROBLEM STATEMENT

Students are often worried about their chances of admission to University. The aim of this project is to help students in shortlisting universities with their profiles. The predicted output gives them a fair idea about their admission chances in a particular university. This analysis should also help students who are currently preparing or will be preparing to get a better idea

ARCHITECTURE

DATA VISUALIZATIONS

1. Acceptance rate of different universities

2. Number of male and female students admitted across different years

3. Finding the university that accepts the most number of international students

4. Percentage of people who directly pursue masters VS percentage of people who pursue masters after working

5. Average GRE, and TOEFL scores of each university
